PROFESSIONAL SUMMARY

Experienced Frontend Developer with a strong focus on React, Redux, and TypeScript, complemented by proficiency in Vue.js, Vuex, MUI, Next.js, GraphQL, Node.js, and other related libraries and frameworks. Bringing over 6 years of hands-on experience in crafting dynamic and responsive web applications. Skilled in utilizing modern frontend technologies to deliver intuitive user interfaces and exceptional user experiences. Well-versed in PHP, JavaScript, and Python, with a specialization in Laravel and Node JS on the backend. Committed to employing cutting-edge tools and adhering to best practices in application development. Holds a bachelor's degree in computer science and eager to leverage extensive development expertise in a challenging role as a FrontEnd Developer.

WORK HISTORY

Senior Software Engineer (FrontEnd), May 2022 to Current
Crowdbotics – California, United States

- Spearheaded the development of modern, polished JavaScript and Typescript solutions leveraging Vue.js & Vuex as well as React.js & Redux.
- Ensured robust code quality through rigorous unit testing and integration testing.
- Facilitated seamless collaboration within remote teams through efficient real-time and asynchronous communication channels.
- Mentored junior team members, fostering their growth, and conducted comprehensive code reviews, emphasizing the importance of testable and scalable code.
- Seamlessly integrated internal and external APIs into applications.

Full Stack Developer, August 2020 to March 2022
JobMatchHub – Lagos, Nigeria

- Managed concurrent front-end and back-end development for a job recruitment platform.
- Ensured high code quality by implementing rigorous unit tests across all components.

Lead Software Developer, December 2019 to June 2020
Lexington Technologies – Kaduna, Nigeria

- Directed a team in the creation of an offline-first healthcare software spanning desktop, web, and mobile platforms.

- Pioneered the development of a robust dashboard tailored for primary healthcare workers, driving significant improvements in staff performance.

Lead Software Developer, June 2016 to September 2019
Dixre – Kaduna, Nigeria

- Leveraged Laravel & Vue.js to deliver bespoke web applications for diverse clientele.

- Provided comprehensive training to over 150 interns from various universities on programming fundamentals and full-stack web development.

- Developed APIs enabling seamless interaction between a mobile app and a SQL Database.

- Architected user interfaces, data visualizations, and enhanced overall user experience, resulting in a notable 20% increase in product sales.
